

Chapter 9

Ganoderma: Diversity, Ecological Significances, and Potential Applications in Industry and Allied Sectors

Marieka Gryzenhout, Soumya Ghosh, James Michel Tchotet Tchoumi, Marcelle Vermeulen, and Tonjock Rosemary Kinge

Contents

9.1	Introduction	296
9.2	Biodiversity of <i>Ganoderma</i>	297
9.3	Ecological Roles of <i>Ganoderma</i>	299
9.3.1	Decay and Rot	299
9.3.2	Plant Pathogen	300
9.3.3	Ethnomycology of <i>Ganoderma</i> Species	302
9.4	Compounds Isolated from <i>Ganoderma</i> Species	311
9.5	Industrial Applications of <i>Ganoderma</i>	313
9.5.1	Mycoremediation	314
9.5.2	Food and Health Service Industry	315
9.5.3	Pharmaceutical Industry	316
9.5.4	Cosmetics Industry	317
9.5.5	Agricultural Industry	317
9.6	Applications of Nanotechnology	318
9.7	Conclusion	319
	References	320

M. Gryzenhout (✉) · S. Ghosh
Department of Genetics, Faculty of Natural and Agricultural Sciences, University of the Free State, Bloemfontein, South Africa
e-mail: Gryzenhoutm@ufs.ac.za

J. M. Tchotet Tchoumi
Institute for Agricultural Research for Development (IRAD), Yaoundé, Cameroon

M. Vermeulen
Biogrip, Geology Department, Faculty of Natural and Agricultural Sciences, University of the Free State, Bloemfontein, South Africa

T. R. Kinge
Department of Biological Sciences, Faculty of Science, The University of Bamenda, Bamenda, Cameroon
