

AMERICAN ORNITHOLOGIST VISITS MUSEUM

Professor Robert E. Ricklefs, the well-known Ornithologist and Ecologist from the University of Pennsylvania, visited the Museum in August to deliver a lecture on the biology and ecology of sea birds on various islands, such as the Galapagos, on which he has recently worked. Professor Ricklefs is perhaps most widely known as the author of *Ecology*, an authoritative textbook which is used by many students.

Prof. R. Ricklefs and Dr R.A. Earlé.

DIE RAAD VAN DIE NASIONALE MUSEUM
