

A detailed architectural sketch in pencil and light grey washes, depicting a complex, multi-level border post or transit facility. The drawing is characterized by sharp, angular lines and a sense of dynamic movement. It shows various platforms, walkways, and structural elements, some with hatching for shading. Faint handwritten labels like 'Passing...' and 'To the...' are visible within the sketch. The overall composition is abstract and conceptual, suggesting a space of transition and movement.

Beyond Borders

Meeting **in-between** - a one stop border post
celebrating the journey beyond the abyss
