

# Chapter 7

## Fungal Cellulases: Current Research and Future Challenges

Soumya Ghosh, Liliana Godoy, Kenneth Yongabi Anchang,  
Conrad C. Achilonu, and Marieka Gryzenhout

### Contents

7.1	Introduction.....	264
7.2	Lignocelluloses.....	265
7.3	Microbial Lignocellulolytic Enzymes.....	266
7.3.1	Classification of Microbial Lignocellulolytic Enzymes.....	266
7.4	Microbial Cellulases.....	272
7.5	Fungal Cellulases Structure and Production.....	273
7.6	Industrial Applications.....	275
7.6.1	Wine and Brewery Industry.....	275
7.6.2	Bioethanol Industry.....	276
7.6.3	Food Processing Industry.....	276
7.6.4	Pulp and Paper Industry.....	278
7.6.5	Textile and Laundry Industry.....	278
7.6.6	Detergent Industry.....	279
7.6.7	Animal Feed Industry.....	279
7.6.8	Agricultural Crop Industry.....	280
7.6.9	Carotenoid Extraction.....	280
7.6.10	Wastewater and Waste Fill Management.....	281
7.7	Bioprospecting of Cellulases: An Essence of the Modern Time.....	282
7.8	Conclusions.....	283
	References.....	283
